

CONFIDENTIAL & PROPRIETARY – NOT FOR PUBLIC DISCLOSURE

LABRADOR·SEVEN·*beta*

Batteries that are your crews' best friend.

A product from Labrador Field Systems, Los Angeles, CA

We started this company because most batteries are made by overseas manufacturers for generalized use cases.

LAB SEVEN is built by scarred industry professionals, delivering a battery tailored to the exacting needs of production crews for any situation.

POWER

- 7.5 kWh storage
- 60A/10kW continuous AC
- 3 20A Edison connectors
- 1 60A Bates connector

CHARGING

- 60A Bates charge (~1 hour)
- 15A Edison charge (~<5 hours)

SAFETY

- Circuit breaker for every outlet
- Lithium Iron Phosphate chemistry - safest in the market

PORTABILITY

- Market-leading energy density
- Two-person lift (<200 pounds)
- 31"x19"x15"

Batteries, without normal battery limits

LAB SEVEN enhances productivity, decentralizing power distribution on set all while working with generators and house power for charging

10X more efficient

Reduce hours in cabling and prep by deploying batteries where they need to be.

Symmetrical fast charging

60A available charging means that you can charge just as fast as you discharge. Charge from a generator during lunch or wrap. Los Angeles productions get free white glove overnight charging during beta period.

Give any house outlet super powers

Plug into house power and turn any outlet into one with 60A Bates out, with passthrough power and charging.

Reduce costs

Fire marshall costs? Generator permits? No longer needed when using LAB SEVEN on its own. The average commercial production saves over \$1,000 by deploying LAB SEVEN.

On-set technicians

Free on-set technical support for Los Angeles productions during beta period.

Cost competitive

Four-battery packages – including white-glove service and charging – start at \$1,000/day, with discounted weekly pricing.

Coming in 2025 and 2026

- Multi-battery software monitoring with offline capabilities.
- Remote support and troubleshooting – we let you know your battery is about to die without you needing to check it constantly.
- LAB THREE – all the technology of the LAB SEVEN but built for a one-handed carry. Fully compatible with the LAB software suite with advanced internal fire suppression system.
- LAB CHARGE – All terrain rapid battery charging system.
- LAB MODULES – customizable battery systems.
